

Complete HTST/UHT Range

From 10L/h up to 1000L/h

HT122
Mini
HTST/UHT

Compact, Ideal for Labs in Development Phase

- User-friendly, easy stability of test runs
- Economical, cost-effective solution

HT205
Spray
Pasteurizer

Accurate, Easy Simulation of Tunnel Pasteurizer

- Versatile, offers PU values to optimize the process
- Plug & play, built-in electric heating

HT220
Lab Indirect
HTST/UHT

Robust, High Level of Automation for Reproducibility

- Modular, enables acquisition of a line in phases
- Reliable, designed considering process first

HT220DSI
Lab Direct
HTST/UHT

Flexible, with Programs to go Indirect or Direct UHT

- Protected, safe operation & equipment protection
- Compact, designed for small spaces & low waste

HT223
Lab DSI
Add-On

Reliable Manual or Automated Critical Control Points

- Modular, seamlessly integration with OMVE HT
- Future-proof, facilitating technology acquisition

HT323
Pilot DSI
Add-On

Reliable. Manual or Automated Critical Control Points

- Custom-built, engineered to facilitate scaling up and down-scaling to meet the most complex formulations

HT320
HTST/UHT
Pilot System

Robust, Built to Last, Tailor-Made

- Solid, engineered to guarantee process conditions.
- Modular, enables connection with other units

HT324
Steam Infusion
Add-On

High Level of Automation & Designed to Facilitate the Job

- Modular with data logger, from theory to practice
- Versatile, endless possibilities for development

HT326
HTST/UHT Pilot
Systems with SSHE

Limitless Potential, Designed to Process Product with Particles

- Cleanability, built-in CIP to maximize testing time
- User-friendly, very easy and simple to use

Heat Treatment

HT

Complete Process Plants

Standard & Custom-Made Systems to Match Your Processing Needs

10L/h HTST/UHT + Homogenizing + Filling

20L/h HTST/UHT + Homogenizing + Filling

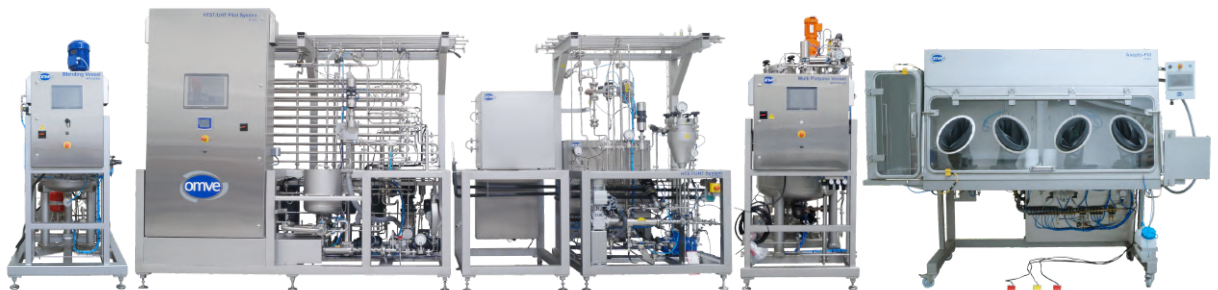

20L/h HTST/UHT Direct & Indirect + Homogenizing + Filling

30L/h Blending + HTST/UHT + Homogenizing + Fermenting + Structuring

50-100L/h Blending + HTST/UHT + Homogenizing + Carbonating + In-Container Pasteurization

100L/h Blending + Indirect HTST/UHT + Hold tubes + Direct UHT, Aseptic Buffering, Aseptic Filling
